Problema săptămânii 358

Arătaţi că pentru orice $a, b > 0$ are loc inegalitatea

$$\left(a^2 + b + \frac{3}{4}\right)\left(b^2 + a + \frac{3}{4}\right) \geq \left(2a + \frac{1}{2}\right)\left(2b + \frac{1}{2}\right).$$

Problem of the week no. 358

Let a, b be positive real numbers. Prove the inequality

$$\left(a^2 + b + \frac{3}{4}\right)\left(b^2 + a + \frac{3}{4}\right) \geq \left(2a + \frac{1}{2}\right)\left(2b + \frac{1}{2}\right).$$
